

NETSCOUTERS

• Netscouters is an investment ecosystem for football.

WHAT IS NETSCOUTERS' PLATFORM?

Target is to empower amateur teams around the world to raise new football superstars and to create football-related content, while giving fans and investors an opportunity to support their favorite's players and earn money with huge ROI.

WHAT IS THE PROBLEM? COSTS OF AMATEUR FOOTBALL CLUBS AND THEIR ACADEMIES

To a large extent, the current organization of Amateur Clubs works thanks to the contribution of their directors and player's parents that, in a disinterested way, contribute to carry out the projects.

It is also true that this contribution is the result of a decision adopted freely and without economic consideration, it is an activity not derived from any obligation and provided free of charge.

With the absence of subsidy, as the main cause, we can say that the situation of amateur Clubs is unsustainable everywhere and we must not forget that they are the main professional football leagues "Providers".

HOW IT WORKS?

Thanks to our rewards table, Clubs generate revenue by uploading and periodically evaluating player videos.

During evaluation process they will also receive commission of the advertisements that appear on players' videos or on products that are sold using the player's video.

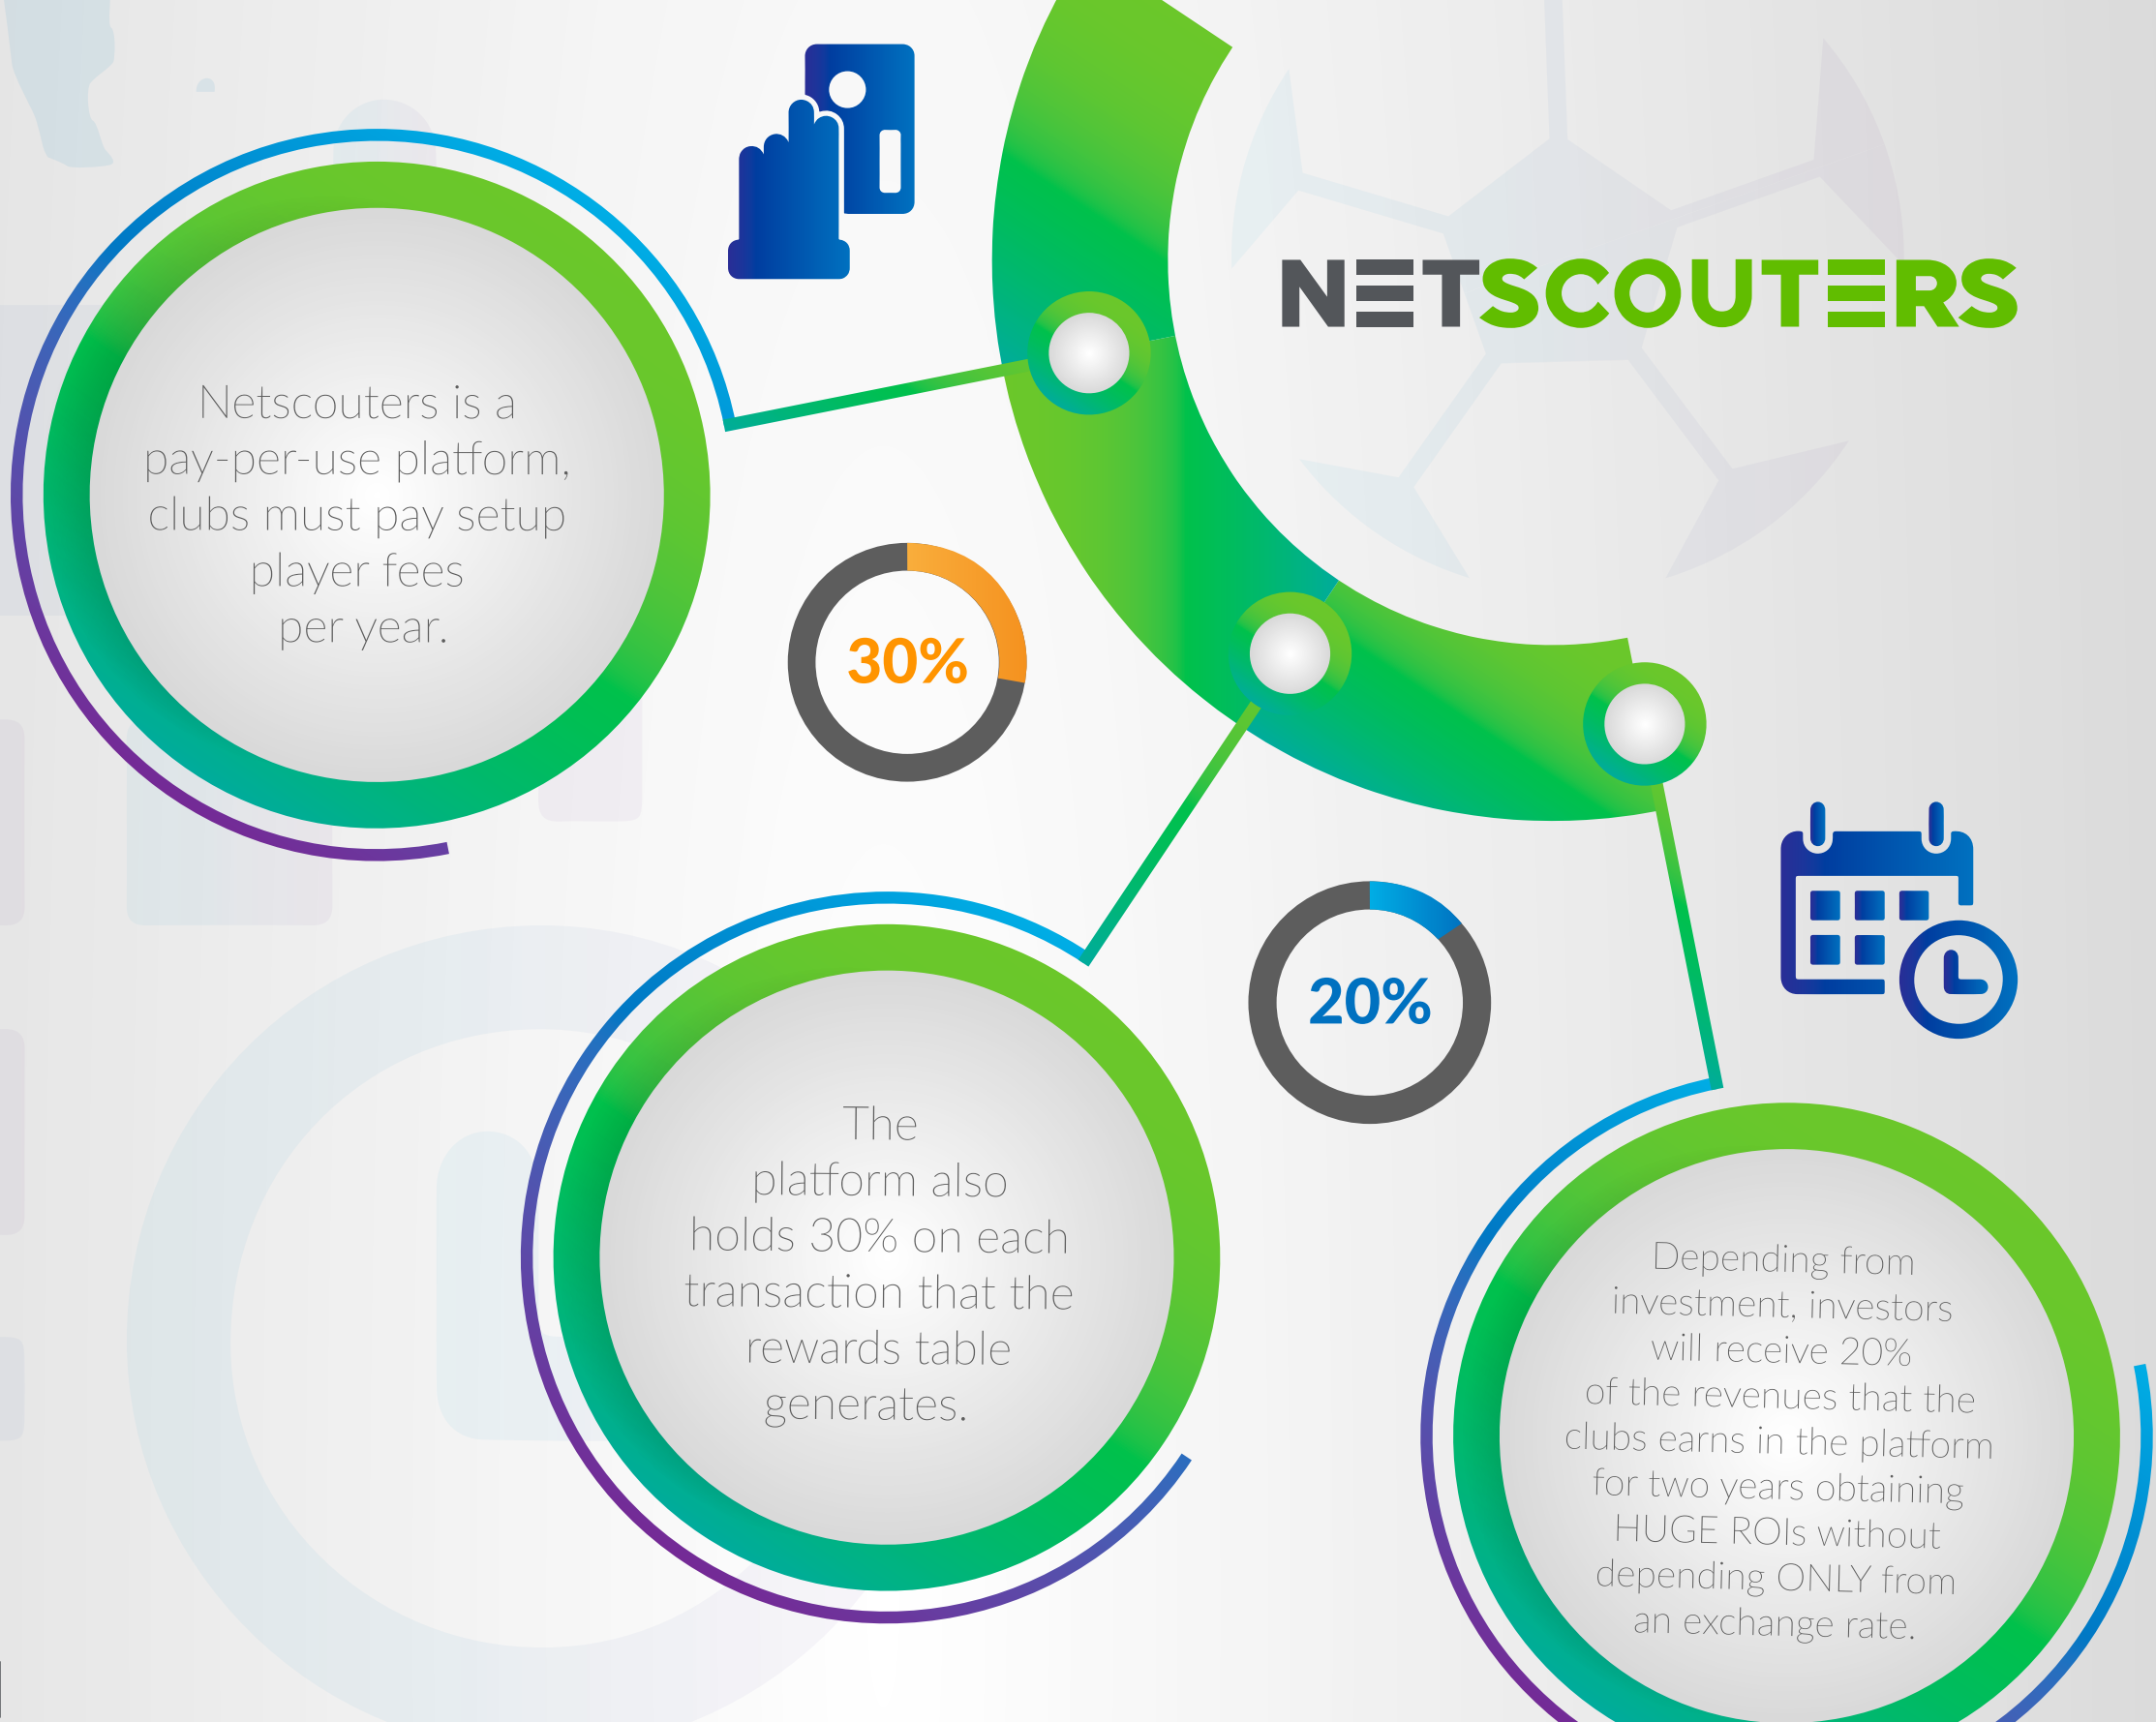

Other sources of entry will be the video-streaming platform where the club's matches will be sold on pay-per-view or fees paid from professional clubs to see player's statistics generated from the platform.

WHAT WE WILL DO

Netscouters is an investment ecosystem for football.
